

housing part (2) of the control unit with the assembly side (14) of the component board mounted facing away from said surfaces of the housing part.

24. (Amended) The electronic control unit of claim 13, wherein the component board (3) is mounted onto a surface of a housing part (2) of the control unit with the assembly side (14) of the component board mounted facing away from said surfaces of the housing part.

Please add new claim 25 as follows:

25. An electronic control unit, comprising a component board (3) on an assembly side (4) of which a plurality of electronic modules (10, 11, 12, 13), are provided with a separate electrical control circuit, an electrical control circuit of an electronic module generates at least one control function for controlling respective operating devices which are not disposed on the circuit board, for electrically connecting the operating devices to the electronic modules (10, 11, 12, 13), a plurality of connector parts (20, 21, 22) are provided with contact elements (50) which are disposed separately on the assembly side (4) of the component board (3), and each electronic module is assigned at least one connector part, which is disposed on the component board in a vicinity of each
